

LOBSTER POT LUCK

A glossary of
reusable
creel plastics

BAIT BAG

Tied to hang across the
middle of pot

TOP

ENTRANCE

DOOR HOOK

A blue door hook with a black rope is the central focus. The hook is made of a smooth, light blue material and has a curved shape with a loop at the bottom. The black rope is attached to the top of the hook and is coiled around it. The background is a dense field of small, light-colored shells, likely seashells, which are scattered and overlapping.

Keeps door of pot shut

ESCAPE HATCH

Lets undersize lobsters out

SPINNER

A white plastic spinner, a common piece of marine debris, is centered in the image. It has a vertical, slightly curved shape with three circular holes: one at the top, one in the middle, and one at the bottom. The spinner is surrounded by a dense field of smooth, rounded river stones in various shades of grey, brown, and tan. The lighting is even, highlighting the texture of the plastic and the natural stones.

Helps stop ropes twisting

BUOY

Marks position of creels
& keeps nets afloat

If you find any of these parts they can be reused.
